

Feel the World. Build the Future.

At Jolly Life BKK, our concept is fostering global awareness for parents and children through meaningful international exchange.

For families traveling to Japan, we want to help you go beyond sightseeing. Japan offers stunning natural resources and rich historical sites that make for wonderful memories. But we believe your journey can become even more memorable when you truly connect with local people and experience cultural traditions firsthand.

We invite you to "travel like you live." Even during a short stay, your child can attend a local Japanese school, take part in activities at our community salon such as Japanese cooking, tea ceremony, and language events, or share stories about your own country with local residents.

We aim to create opportunities not just for one-way learning but for active, mutual exchange that will make your journey truly special.

Our Services Include:

- Support for trial enrollment in Japanese schools for preschoolers and elementary-aged children
- Assistance with accommodation arrangements
- Information and invitations to cultural exchange events at our international community salon
- Japanese language classes (both online and in-person)
- Special holiday programs during Japan's long school breaks (full-day courses from 9:00 AM to 4:00 PM, limited periods only)

As a qualified teacher with 17 years of experience living overseas, and as a parent who traveled "like a local" with my own young child, I understand what families need for a meaningful and stress-free experience. I'm committed to providing caring, personal support based on these experiences.

If you're interested, please feel free to contact us. We'd love to help make your family's journey in Japan truly enriching.
